

# Universal Bedlegs

A modern, childsafe, economical bed support system replacing the conventional metal bedframe

## Bedlegs are Better

Universal Bedlegs are a modern, innovative, bed support system, replacing the conventional, metal bedframe. Available in a selection of variable heights, Universal Bedlegs easily screw into a threaded base plate, which attaches directly to the box spring with a power screwdriver for quick installation. Bedlegs are produced with high-density plastic polymer materials that are also

used in the manufacturing of some automotive parts, resulting in a strong, durable and safe bed support system. Our product has also been used to service Seniors and handicapped needs. All shipments include Bedlegs, base stems, and screws. Universal Bedleg's unique system fits all standard-size boxsprings, provided the manufacturer utilized quality materials and the required rail dimensional requirements.

### Bedlegs Benefits

- Childsafety—creates "kid friendly" environment with no sharp edges.
- Create extra storage space - up to 35 cubic square feet
- Variable Bedleg heights: 3-, 5-, 7-, and 10-inch

### Childsafe Sleeping and Play Environment

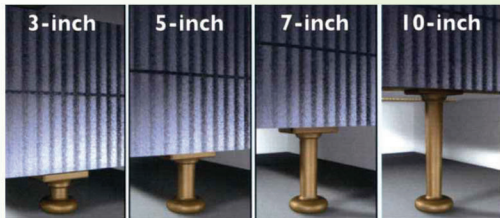

Universal Bedlegs provide a childsafe sleeping and play environment, and create a "kidfriendly" bed. By replacing the conventional bedframe, any unsafe protruding sharp edges are eliminated, reducing potential risk of injury or stubbed toes.

- bedlegs raise bed height to create extra storage for baskets or boxes
- Create lower or higher profile beds for a contemporary or European look
- Accommodate Seniors and children for ease of getting in and out of bed
- Safer than conventional metal bed frames
- When your luxury pillow top bed is simply too tall, the 3-or 5-inch Bedleg will lower the bed's profile

### Better support and more benefits

The innovative Universal Bedlegs system gives direct support to the mattress and box spring, including center support. Uni-versal Bedlegs have been used and endorsed within the Hospitality and Home Furnishing Industry for over 35 years.

Universal Bedlegs glide easily; they will not harm linens, carpets or hardwood floors. Universal Bedlegs headboard brackets easily attach to most headboards. Universal Bedlegs patent number: 5,688,287 Universal Bedlegs headboard bracket patent number: 5,743,672
